

June Quarter Production Results

Metro Mining (ASX: MMI) is pleased to provide production and shipping results for the June Quarter.

Bauxite Hills Production Results

Period	April*	May	June	Quarter
Bauxite Mined (WMT) ('000)	124	329	427	880
Bauxite Shipped (WMT) ('000)	151	311	374	836
Bauxite Mined (WMT per day)	6,249	10,601	14,231	n/a
Bauxite Shipped (WMT per day)	8,401	10,034	12,467	n/a

*NB: April was a partial month due to Cyclone Trevor and ship loading commenced on 13 April 2019

The Bauxite Hills Mine experienced a steady ramp-up during the quarter and has now reached the budgeted operating rates and achieving consistent results on a daily basis.

As outlined in the recent Operations Update (refer ASX Announcement 11 June 2019), Metro encountered some unexpected adverse swell conditions starting late May. These conditions gradually improved and returned to expected conditions around 10 June 2019. From this point onwards, daily shiploading rates have averaged over 15,000 WMT per day, including a daily record of 20,835 WMT.

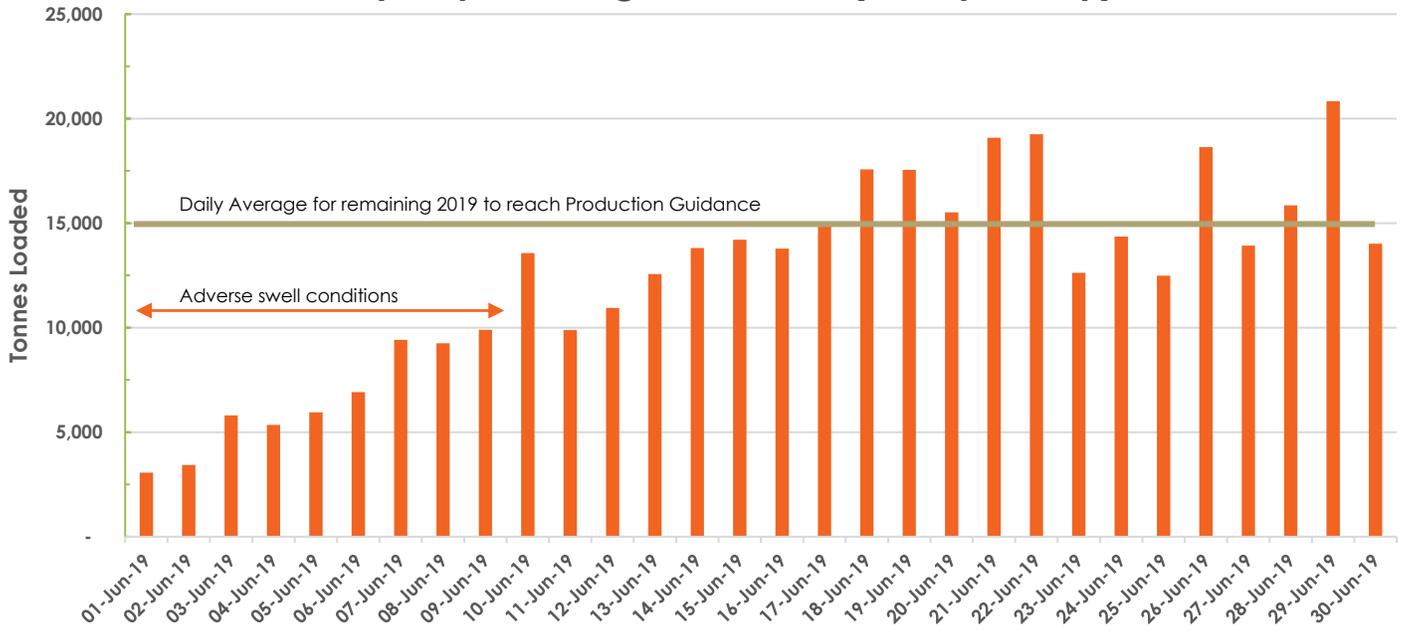

Metro is confident of maintaining these levels throughout the year and remains on track to meet its production and shipping guidance of 3.3-3.5M WMT.

Detailed information will be contained in the June Quarterly Activities Report.

Commenting on this quarterly operating performance, Metro's Managing Director and Chief Executive Officer, Mr Simon Finnis, said:

"While it was a challenging start to the quarter, I am extremely proud of how the site team and our contract partners responded to resolving issues as they arose. All aspects of the operation have finished the quarter performing strongly, and we have laid the groundwork to meet our current production guidance".
