October was another excellent month for the Bauxite Hills Mine with shipment levels of 504K Wet Metric Tonnes being the strongest since operations commenced in April last year.

Transshipment activities continue to benefit from good weather conditions and seasonal high tides with loading rates maintained above 16,000 tonnes per day. Campaign crushing of over-sized stockpiles at the port was undertaken during the month, meaning less ROM bauxite was required to be mined to meet sales commitments.

Metro Mining Managing Director and Chief Executive Officer, Simon Finnis, said:

"The mining and shipping results are now consistently performing at or above our budget requirements; reflecting enhanced operational knowledge and experience. I anticipate a strong finish to the 2019 operating season and Bauxite Hills remains on track to meet the production and shipping guidance of 3.3-3.5M WMT".
